### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Note that, Applicant's amendment, Applicant's arguments, and the Examiner's Amendment are sufficient to place the instant claims in condition for allowance.

Of the references of record, the most pertinent are WO99/46356, Hohn-Stocker et al (US 6,172,035), Librizzi (US 6,514,918), or EP 232,153.

'356 teaches improved modified monoethanolamide compositions wherein the modified monoethanolamide compositions, which are liquid at ambient temperatures of lower, exhibit surfactant properties substantially the same as those exhibited by diethanolamides such as foam stabilization and viscosity building as well as other desirable characteristics. See Abstract.

Hohn-Stocker et al teach thickening agents based on fatty acid monoisopropanolamide which are etherified with ethylene oxide and/or propylene oxide, their use in surface-active formulations and formulations comprising an active amount of these thickening agents. See Abstract.

Librizzi teaches a cleaning composition which is mild to the skin and eyes which includes a fatty monoethanolamide compound and at least one anionic surfactant. The composition may also include nonionic, amphoteric, betaine, and cationic surfactants. The compositions are useful as shampoos, washes, baths, gels, etc.

'153 teaches a liquid detergent composition suitable for dishwashing by hand containing an anionic detergent, alkyl ether sulphate, a lather booster which is an alkanolamide, dialkanolamide, betaine or amine oxide, and a nonionic detergent. See

Abstract. Suitable nonionic surfactants include ethoxylated alkanolamides which have a similar structure to the compounds recited by the instant claims. See page 18, lines 5-20.

However, '356, Hohn-Stocker et al, Librizzi, or '153, as noted in the Applicant's arguments, teach or suggest a fatty acid alkanolamide compound as recited by the instant claims.

None of the references of record, alone or in combination, teach or suggest a fatty acid alkanolamide compound or method of using such a compound as recited by the instant claims. Accordingly, since the prior art fails to teach or suggest a compound and method of using such a compound as recited by the instant claims, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
